

AI & YOUR STUDIES

Use AI ethically. Learn honestly. Build your future.

AI can help you learn — but it should support your work, not replace it.

✓ USE AI TO:

- Brainstorm ideas and topics
- Explain difficult concepts
- Help you understand course materials
- Check spelling, grammar and clarity
- Create study questions and revision activities
- Get feedback on your learning

⚠ USE AI RESPONSIBLY:

- Check AI-generated information for accuracy
- Follow your trainer's instructions about AI
- Acknowledge AI use when required
- Protect personal, confidential and workplace information
- Make sure submitted work reflects **your own knowledge and skills**
- **Don't blindly trust AI generated information and answers**

✗ DON'T USE AI TO:

- Submit AI-generated work as your own when this is not permitted
- Complete assessments dishonestly
- Create fake evidence, workplace records or references
- Copy answers without understanding them
- Upload someone else's personal or confidential information

🎓 YOUR ASSESSMENT = YOUR LEARNING

Your RTO needs to be able to verify that **you have developed the required skills and knowledge**. Using AI in a way that prevents your trainer from accurately assessing your work may be considered inappropriate.

💡 BEFORE YOU USE AI, ASK:

"Am I using AI to help me learn, or am I using it to do the learning for me?"

When in doubt, ask your trainer or assessor.
